Article 1. – Technical services

On the Exhibitor's order it is possible to provide the inlet of power supply, water and sewerage, telephone, Internet, cleaning and possibly other services to all expositions in both indoor and outdoor areas. The inlets of the power supply, water and sewerage, Internet and telephone connections are brought from the floor conduits and channels, whose location will be marked on the raster with the location of the Exhibitor's exposition.

a) Order of power supply

For the stands which are not ordered from the Organizer the Exhibitors are obliged (apart from the exceptions permitted by the Organizer) to have their own switchboard - adapted to the 5-wire distribution system, or the voltage system TNS 3L + N + PE, 50 Hz. A single-phase connection of the exposition is carried out through a standard plug of 230V/16A - L + N + PE, three-phase consumers must be fitted with a recommended ball plug of 400V/32 A - 3L + N + PE.

The connection of larger power inputs will be carried out upon an agreement with the Organizer. Electrical equipment of Exhibitors which is not fitted with separate operation N (neutral) and protecting PE (grounding) wires, or which is not fitted with a protecting wire, without its featuring double insulation, or the wires of which do not have appropriate cross section, will not be allowed for connection, for the reason of the protection of visitors from electric accidents and for fire safety reasons. If necessary, it is possible to order, before the assembly deadline, the services of an electrician at a price of CZK 450 per hour (every started hour of work is billed), which is to be paid in cash at the cash desk of the Trade Fair Administration. The price for the power supply inlet includes the inlet to the stand (230 V or 400 V) with a possibility of its use for the duration of assembly and dismantling (maximum consumption of 2 kW/230V for electrical tools). It also includes the lease of the appropriate part of the hall switchboard, consumption of electricity and electrical inspection in the course of the exhibition. The actual inlet the stand represents 1 to 2 sockets - 230V (without a distribution within the stand), or 1 socket of 400V, possibly a combination of 230 and 400 V.

The power input required by the Exhibitor to the stand must include the total of all the power inputs of electrical appliances in the exposition, i.e. illumination, cooker, coffee machine, tea kettle heating unit, through-flow water heater, computer, television set and video recorder, exhibits etc. For the purpose of a more exact order we provide the following examples: Illumination of a 9 m² stand about 0.5 kW, kitchen complete set about 3.5 kW, coffee machine (for drip coffee) about 0.8 - 1.2 kW, tea kettle heating unit about 2 kW, two hot-plate cooker about 2 kW. These power inputs are only for your orientation - it always depends on the particular electrical appliance which is connected.

The firm implementing the stand shall be liable for the inspection of the electrical installation. If the electrical installation does not meet the requirements, it will remain, to the Exhibitor's detriment, unconnected.

CAUTION! In the case you intend to use a refrigerator in your stand, we recommend you to order the refrigerator circuit separately, as it will not be turned off overnight. The price does not include the power input of electrical energy. This power input must be included in the electrical power input order.

b) Order of water and sewerage

The connection of the sink, i.e. of an ordinary battery to the closing valve and of an ordinary siphon outlet with a 5/4" hose is included in the price of the "water inlet and sewerage". The lease of the sink is not included in the price of water inlet and sewerage. If you want to make a wider use of the plumber's service exceeding the connection of the sink, you will be charged CZK 450 per hour (every started hour of work is billed). The settlement of this service is payable in cash at the cash desk of the Trade Fair Administration.

c) Daily cleaning includes vacuum cleaning of the Exhibitor's stand carpet + emptying of the waste basket every day, after the end of the Exhibition business day, i.e. in evening hours, or on the basis of the

special requirements of the Exhibitor in morning hours before the opening of the Trade Fair. Any additional requirements beyond the above mentioned framework will be charged separately to the Exhibitor.

d) Overhaul cleaning - cleaning of the exposition after the end of the assembly before the beginning of the Trade Fair. This includes removal of the cover foil from the carpet, vacuum cleaning, emptying of the waste basket every day, dust removal from the shelves.

e) Other services

The Organizer will provide, free of charge, working illumination, fire brigade and health service, Trade Fair protocol, and as a paid service it will provide ordinary cleaning of expositions, florist's service, dispatching and customs services, insurance service, postal service, telephone and fax centre, hostesses and interpreters, promotional and photograph services, graphic design and production, arrangements services, accommodation and catering services. The Organizer will send the Order Catalogue of Services, Organisational Instructions and the exhibition raster system to the Exhibitors sufficiently in advance of the Trade Fair commencement.

f) Connection to the Internet

Two types of connection are possible at the Exhibition Centre – fixed cable connection by means of a cable and a Wi-Fi wireless network (not available on the outdoor areas).

The fixed cable connection by means of a cable is implemented through a connection line to the local network "ETHERNET 10/100/1000 MBit/s". The device to be connected must be equipped with the ETHERNET 10/100/1000 MBit/s network card with a possibility of the RJ-45 connector connection. The maximum baud rate of the connection is 3 MBit/s. For a stable and permanent connection we do recommend you to use this type of connection.

The connection to the wireless network (Wi-Fi) can be used if the Exhibitors do not require a high quality and stability of the connection. The quality is affected by the number of simultaneously connected clients, in the case of an unauthorised use of the transmitting Wi-Fi equipment by an Exhibitor the line may be subject to interference and the connection quality may decrease. The maximum baud rate of the connection is 1 MBit/s. The device to be connected must be equipped with the Wi-Fi network card.

For the connection into the network (for both types of connection) it is necessary to set the acquisition of an IP address from the DHCP server. In order to get connected to the network it is necessary to enter the username and password in the Internet browser, it will be handed over to the Exhibitor at the technical assistance session during the Exhibitor's registration.

In order to connect the equipment which does not make it possible to enter the username and password (payment terminals, routers, etc.) it is necessary to order a Static IP address service on an additional basis. For both the types of connection, the basic price of the connection includes a simultaneous connection of one device. After logging off it is possible to use the same username and password on another device. An Exhibitor who has ordered a connection (of either type) can make an additional order of an advantaged connection of another device. The Internet connection is active not later than at 18:00 hours on the day preceding the first day of the event. During the opening hours, SLA shall be 98%. In the case that this SLA is not ensured by The Organizer, the Exhibitors are entitled to receive a proportional reduction of fee for the Internet connection. The Organizer shall not be responsible for damage or other harm incurred by the Exhibitors due to the fact that the service required was not provided in a full extent. Any requirements for a higher baud rate must be negotiated by the Exhibitor with The Organizer. The Exhibitor is responsible for protection of the connected equipment from viruses, spyware, adware and other malicious programs. In the case that any of the above mentioned malicious programs is identified on the Exhibitor's equipment connected, The Organizer is authorised to disconnect the connection line without any compensation until the malicious programs

are removed by the Exhibitor. In order to eliminate interference of the Wi-Fi network in the Exhibition Centre area it is forbidden to use one's own Wi-Fi transmitters. In the case of a requirement for a necessary operation of such equipment during the exhibition event it is necessary to make a consultation and obtain an agreement of the The Organizer technician. It is not allowed to activate the DHCP server service on the equipment connected.

Article 2. – Stand construction

1. The Organizer will ensure the construction of the stand in both indoor and outdoor areas on the basis of the receiving of an order. There are type stands in the OCTANORM system available for the indoor area, with dimensions according to the Type Stand Order. **ATTENTION!** Consumption of power supply for the type stands must be ordered separately. It is possible to order the additional furnishing with movable items of the type stands.

2. Furthermore the Organizer offers the construction of individually designed stands (lease) for the indoor area according to special requirements of the Exhibitor, including their furnishing with movable items (lease).

3. In the case that the construction is implemented through the Organizer, it is possible to ask for a free-of-charge 3D visualisation. Nevertheless, if the visualisation is processed and the construction is not implemented through the Organizer, the organiser will charge an amount of CZK 3 500 without VAT for the design creation.

Article 3. – Technical and operating preconditions

1. The architectural realisation and the operation of the exposition or billboard must not disturb or limit other expositions. The firm whose walls (side as well as the rear) exceed the height of 250 cm and neighbour on the rear or side wall of the surrounding stands is obliged to design this height above 250 cm in a neutral way from the construction and graphic points of view. The use of these raised walls for one's own advertising purposes is inadmissible and if used this way – the firm will be forced to remove the advertising and to design the walls on a graphically neutral way at its own expense. Billboards exceeding the height of 250 cm have to be placed at a distance of at least 1.5 m from neighbouring stands.

2. The outline of the exhibition stands must not exceed the outline of the exhibition area leased by the Exhibitor, which applies also to the space above the ceiling structure of the stand as well. Possible overhang of the collar or eye-catcher of the stand to the path is allowed on the basis of the prior approval given by the Organizer, if the minimum height of the bottom edge is 3 m, and it will be subject to the payment of CZK 1,000 for each m² of its projection into the ground plan (including a fractional part of m²).

3. Except for handling trucks, the entry into the exhibition areas is prohibited for any means of transport and cars of the Exhibitors. If the floor of the hall is damaged, the Exhibitor is obliged to reimburse the damages to the full amount. Motor vehicles as exhibits can be put on display under the condition that their tank does not contain any fuel and is disconnected from the battery.

4. Smoking and naked flame handling are strictly prohibited in the entire indoor exhibition areas, any breach of this ban will result in the charging of a contractual fine amounting to CZK 5 000, payable immediately in cash.

5. No electrical appliances may be left in operation without any supervision. When leaving the place, the appliances must be disconnected from the mains.

6. It is not allowed to hang any eye-catchers and flags of the Exhibitors, on the structure of the halls with the exception of the cases pre-discussed with the Organizer and subject to a fee.

7. During the assembly in the indoor exhibition premises it is forbidden to cut and grind any building elements, which causes excessive pollution and dust formation (plasterboard, tile materials, fibreboard and other similar materials).

8. The stand must not touch the structure, walls and roof of the exhibition halls with any of its parts. The distance between the highest point of the stand and the hall roof must be at least 70 cm.

9. For the laying of carpets into expositions in the halls it is necessary to adhere to the following procedure: First glue a masking – paper tape onto the concrete floor, and then an arbitrary two-sided carpet tape. It is possible to buy the masking tape directly in the Exhibition Centre.

10. It is forbidden to discharge the remains of paints and other toxic substances which could pollute or otherwise endanger the environment into the sewerage, sinks and basins. The Exhibitors (or the firms authorised by the Exhibitors) are obliged to take these substances away and ensure their disposal at their own expense.

11. Storage of any materials in technical corridors (in particular behind

the rear wall of the stand) is unacceptable for fire, safety and operational reasons. The storage of the packages, including their removal and return delivery to the stand can be ordered from the contractual forwarding service of the Organizer.

12. The exhibits which are to be presented in the operation can only be serviced by the persons authorised thereto. The exhibits to be presented must be secured by the Exhibitor in such a way that no third party could handle them wilfully.

13. Except for the prescribed business hours of the Trade Fairs and permitted time interval for the supplying of the stands it is forbidden to stay in the exhibition areas. Please, respect for this reason the instructions of the Security Service and of the the Organizer staff.

14. If the final deadline for the clearing of the exhibition area fails to be observed, a contractual penalty amounting to CZK 50 per m² and hour of the non-cleared area will be charged. In the necessary case, the exposition will be cleared by the Organizer at the expense of the Exhibitor. The risks associated with the clearing shall be borne by the Exhibitor.

15. The Exhibitors are obliged to hand over, by the deadline for disassembly works, the leased exhibition area completely empty, clean and in the condition in which it was taken over, i.e. also the floor covering (carpets, PVC) must be removed as well as the sticking carpet tapes, such a removal being carried out at the expense of the Exhibitors, and the Exhibitors are also obliged to return all movable assets which they have taken into lease from The Organizer, in an undamaged condition. Should the exhibition area or leased areas be damaged and/or contaminated, the Exhibitors will be obliged to reimburse the damages in full. In the case of damage to the panels of the OCTANORM system, the Exhibitor will be charged, on the basis of photo-documentation, an amount of CZK 600 for each panel damaged. The Exhibitor will not be entitled to the handover of the panels damaged.

16. Any changes relating to the Order of Technical Services, construction and equipment of stands required by the Exhibitor additionally after the term of commencement of the assembly will be accommodated only after the timely ordered work and services towards the other Exhibitors. These additional orders of work and services can be charged by the Organizer with a surcharge amounting to as much as 100% of the price calculated. The payment shall be made by the Exhibitor in cash on site.

Article 4. – Submission of details for the installation of technical connections and stands

1. The Exhibitors who order the erection of the stand from the Organizer will send their orders by the closing date stated in the Application Form documentation.

2. The Exhibitors who ensure the erection of the stand on their own or through an advertising or realisation firm will send to the Organizer, not later than 30 days before the Trade Fair commencement, the binding design of the stand for approval (in the front view and ground plan) where all possible dominant heights and eye-catchers, including the stand orientation within the framework of the ordered area will be drawn by means of the location dimensioning of the inlets of power supply, water and sewerage. In the case that the Exhibitors fail to send appropriate backgrounds within the requested deadlines to the Organizer, they will expose themselves to the danger of possible difficulties during the implementation of the stands and possibly to additional financial costs connected with the relocation of power supply, water, sewerage or other services.

3. The Exhibitors are fully responsible for the activity in the exhibition premises of the advertising or realisation firm authorised by them.

The present Technical Conditions form is an integral part of the Binding Order of Technical Services.
